# ALCHEMY ASCENT - MAGIC OR METHOD

## Preamble

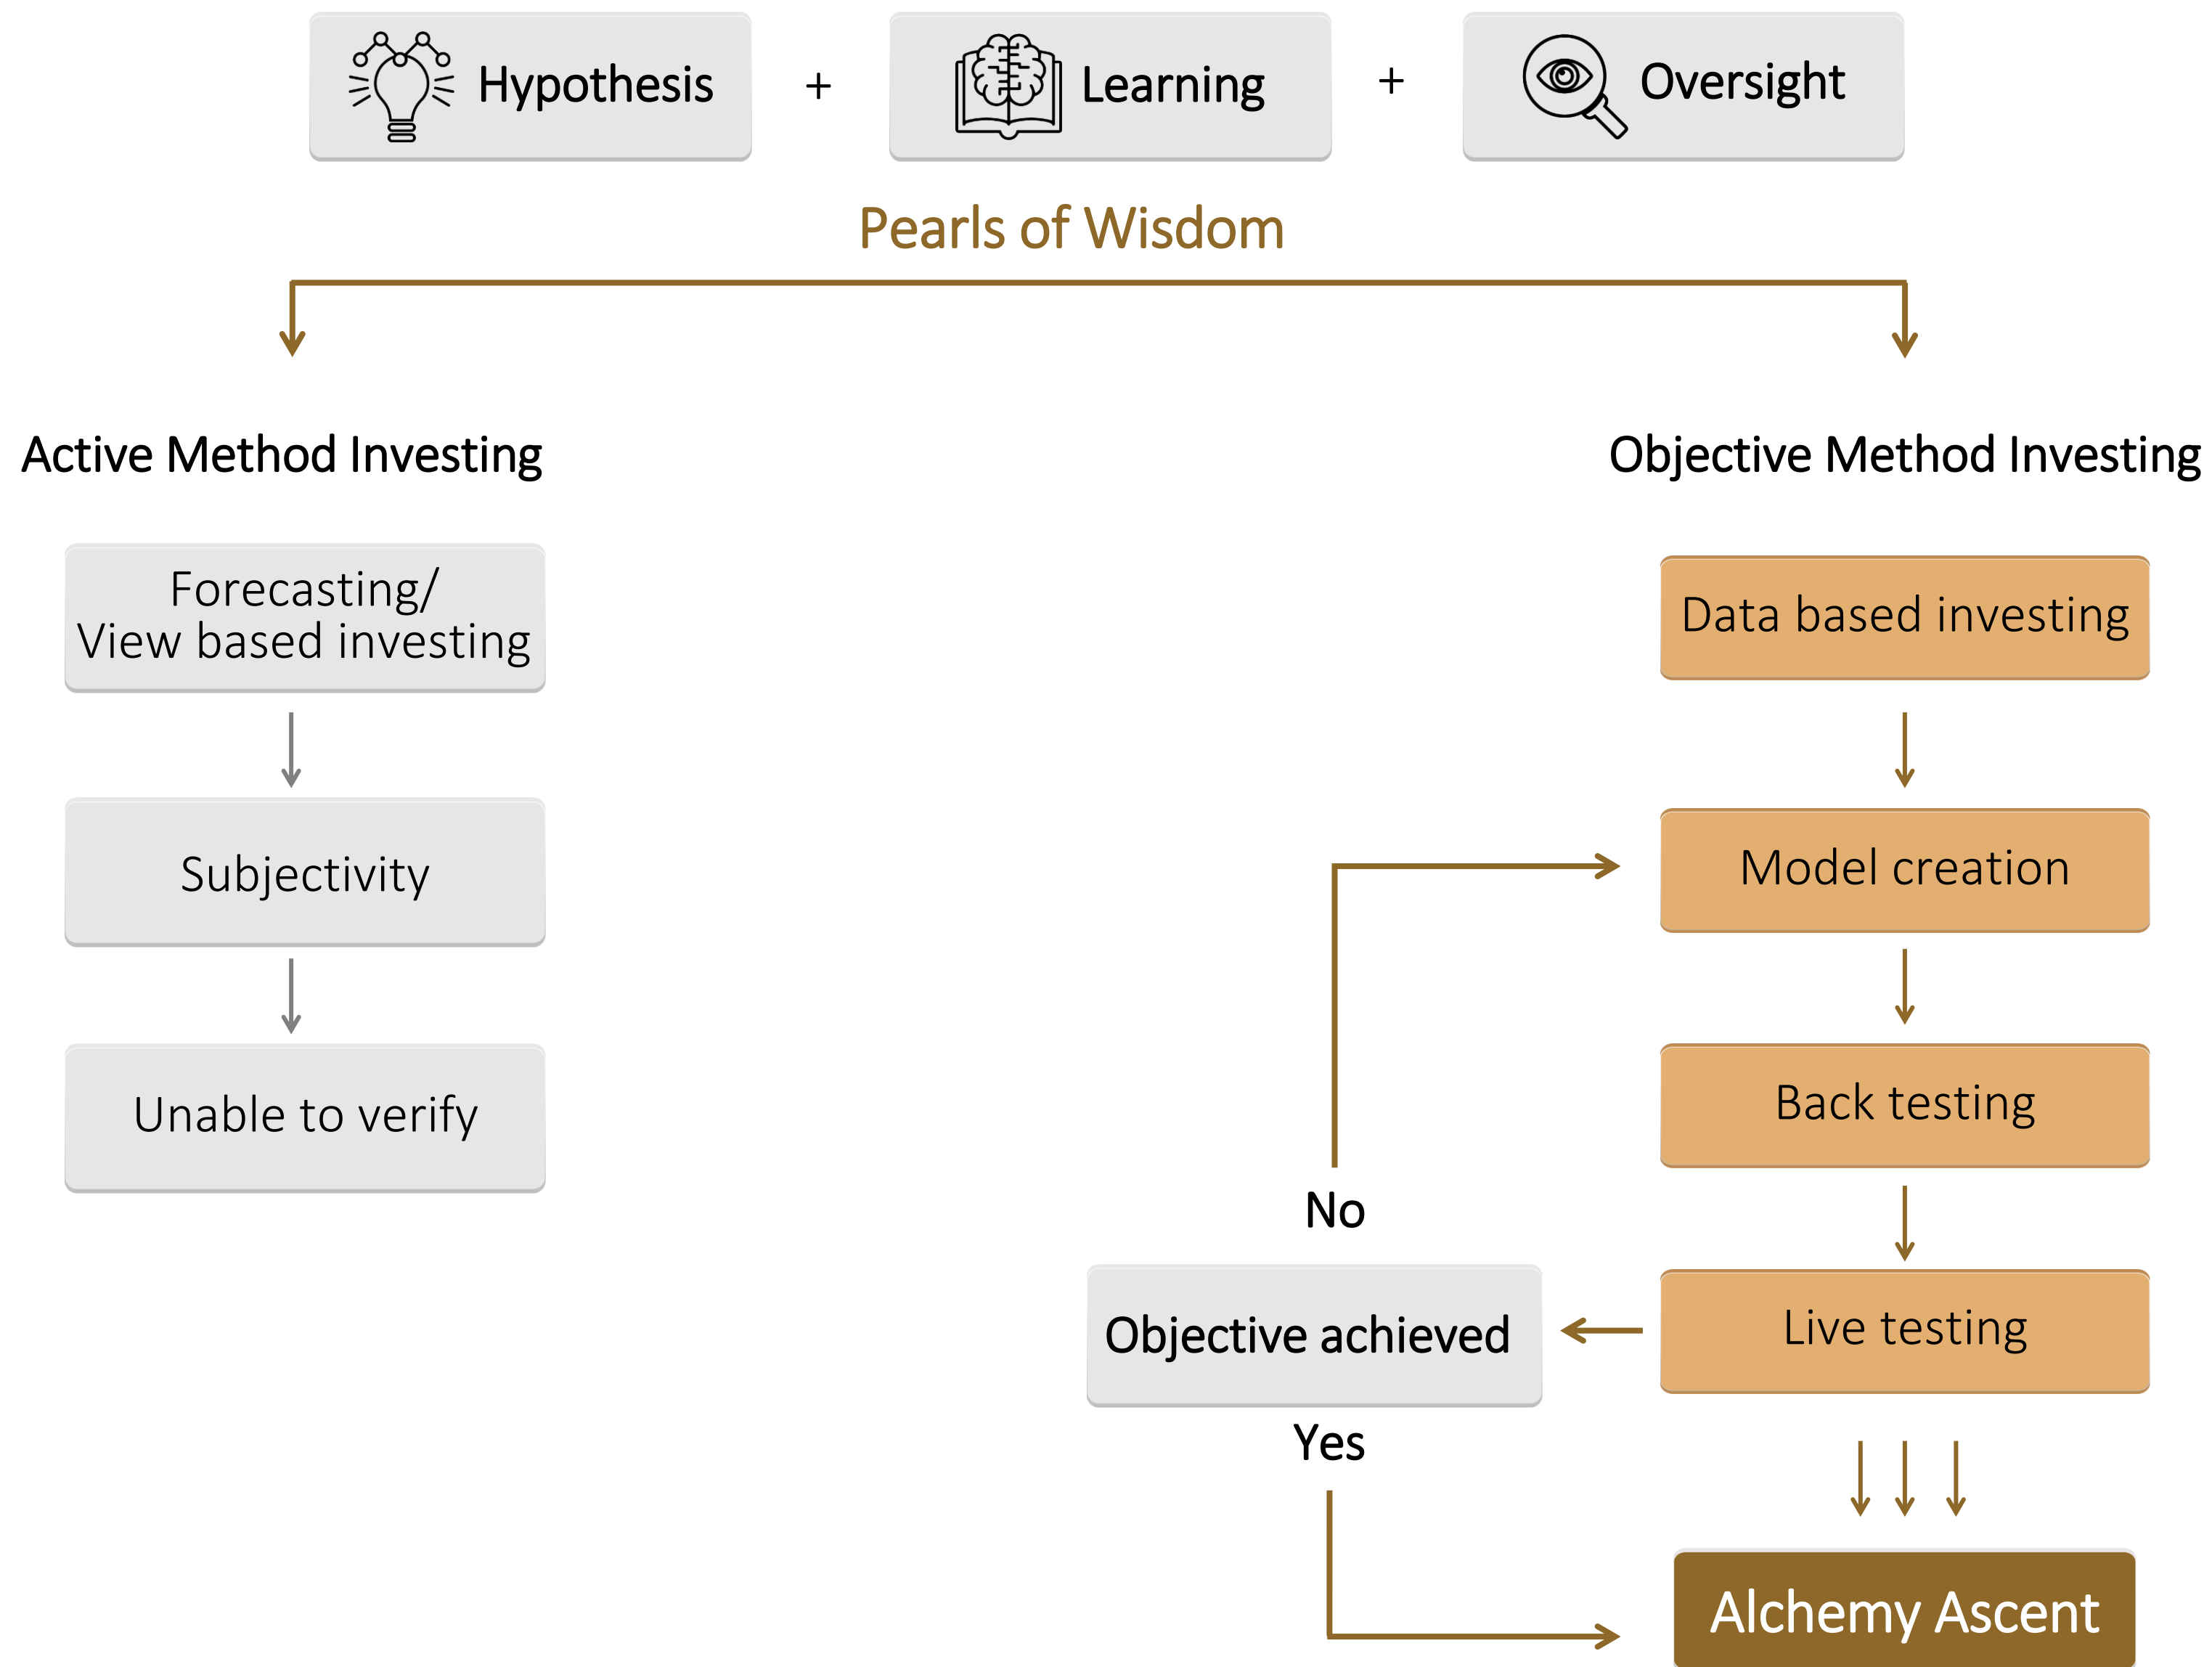

In the current investment world it is believed that the key to any successful investment strategy is in finding the “right stock”, the “right theme”, the “right sector” and the “right cycle”. Even the most experienced investors are prone to biases which are inherent in the investing process. This results in inconsistent alpha generation.

- However, we believe that building a high performance portfolio involves much more. Stock allocation, its relative ranking in the portfolio and timing along with risk controls, also play a very important part of the alpha generation process. We believe in strong data based research process, which considers all sources of alpha generation comprehensively, thus helps in creating an unbiased and disciplined investment approach – a key to successful and consistent investment outcomes.
- **Alchemy Ascent\*** endeavors to provide a consistent "high alpha" investment strategy which build portfolios to deliver consistent outperformance over the long term, using an objective, back tested and data driven approach devoid of any biases.

*\*The investment objectives and strategy are indicative and there are no assurances that they will be achieved.*
