(iv) Details of Services being offered

The Portfolio Management Services of the Portfolio Manager have been structured broadly under the following categories:

a) Discretionary Portfolio Management Services

Under the Discretionary Portfolio Management Services, the Portfolio Manager shall deploy the Assets brought in by a Client by investing or divesting suitably in the capital markets as per the Act and Regulations. The Portfolio Manager shall be acting in a fiduciary capacity, as a trustee, with regard to the Client's account consisting of investments, accruals, benefits, allotments, calls, refunds, returns, privileges, entitlements, substitutions and / or replacements or any other beneficial interest including dividend, interest, rights, bonus as well as residual cash balances, if any (represented both by quantity and in monetary value). The Portfolio Manager will provide Discretionary Portfolio Management Services which shall be in the nature of investment management, and may include the responsibility of

managing, renewing and reshuffling the Portfolio, buying and selling the Securities, keeping safe custody of the Securities and monitoring book closures, dividend, bonus, rights etc. so that all benefits accrue to the Client's Portfolio, for an agreed fee structure and for a definite period as described, entirely at the Client's risk. The Portfolio Manager shall have the sole and absolute discretion to invest on behalf of the Client in any type of security as per executed Agreement and make such changes in the investments and invest some or all of the Funds in such manner and in such markets as it deems fit. In case of Large Value Accredited Investors, the Portfolio Manager may invest up to hundred percent of the assets under management of such investors in unlisted securities, subject to the terms of the Agreement executed. The Portfolio Manager's decision (taken in good faith) in deployment of the Clients' account is absolute and final and cannot be called in question or be open to review at any time during the currency of the Agreement or any time thereafter except on the ground of malafide, fraud, conflict of interest or gross negligence. This right of the Portfolio Manager shall be exercised strictly in accordance with the relevant acts, rules and regulations, guidelines and notifications in force from time to time.

b) Non-Discretionary Portfolio Management Services

Under this category, the investment decisions of the Portfolio Manager are guided by the instructions received from the Client under an agreement executed between the Portfolio Manager and the Client. The deployment of Funds is the sole discretion of the Client and is to be exercised by the Portfolio Manager in a manner that strictly complies with the Client's instruction. The decision of the Client in deployment of Funds and the handling of his / her / its Portfolio is absolute and final. In case of Large Value Accredited Investors, the Portfolio Manager may invest up to hundred percent of the assets under management of such investors in unlisted securities, subject to the terms of the Agreement executed. The role of the Portfolio Manager apart from adhering to investments or divestments upon instructions of the Client is restricted to providing market intelligence, research reports, trading strategies, trade statistics and such other material which will enable the Client to take appropriate investment decisions. However, the Portfolio Manager will continue to act and strictly guided by relevant guidelines, Acts, Rules, Regulations and notifications in force from time to time. For the purpose of acting on the Client's instructions, the Portfolio Manager shall take instructions in writing or through any other media mutually agreed such as e-mail, fax, telephone or suitable and secured message and may include managing, renewing and reshuffling the portfolio, buying and selling the Securities, keeping safe custody of the Securities and monitoring book closures, dividend, bonus, rights etc. so that all benefits accrue to the Client's Portfolio, for an agreed fee structure and for a definite described period, entirely at the Client's risk.

c) Investment Advisory Services

The Portfolio Manager will provide advisory services, in terms of the SEBI (Portfolio Manager) Regulations, 2020 and SEBI (Investment Advisers) Regulations, 2013, which shall be in the nature of Investment Advice and may include advice relating to investing in, purchasing, selling or otherwise dealing in Securities or investment products, and advice on investment portfolio containing Securities or investment products, whether written, oral or through any other means of communication for the benefit of the Client and may include financial planning. Investment Advice shall be for an agreed fee structure and for a period hereinafter described, entirely at the Client's risk; to all eligible categories of investors who can invest in Indian market including NRIs, FPIs, etc. The Portfolio Manager shall be solely acting as an advisor to the Client and shall not be responsible for the investment / divestment of Securities and / or administrative activities on the Client's Portfolio. The Portfolio Manager shall act in a fiduciary capacity towards its Client and shall maintain arms length relationship with its other activities. The Portfolio Manager shall provide advisory services in accordance with such guidelines and / or directives issued by the regulatory authorities and / or the Client, from time to time, in this regard.

5. Services Offered

(i) Investment Objectives

The investment objective of our Services is to deliver long term capital appreciation by delivering better risk-adjusted returns. In Products/ Investment Approaches which are long only in nature, the endeavor is to beat the relevant benchmark over the relevant time horizon. Hence the cornerstone of the investment objectives is long term investment performance and endeavor to optimize risks and rewards. However, it needs to be reiterated that investments in securities entail a degree of risk and that there can be no assurance and / or guarantee of such growth/preservation of capital or of there being no capital loss.

(ii) Products/ Investment Approaches of the Portfolio Manager

Our Product/Investment Approach is to rely primarily on fundamental analysis. The Portfolio Manager uses a combination of bottoms up and top down research to identify investment opportunities. Apart from fundamental analysis of the relevant sector/company, the approach also involves assessing other qualitative factors like quality, dynamism and depth of management. It may involve management/plant or site visits and interaction with senior managements of companies. In trading oriented strategies a

combination of fundamental or pure technical/momentum driven factors are taken into consideration. Once there is a high level of conviction, the Portfolio Manager may take concentrated bets on the investments so chosen. However, adequate care is taken for diversification and allocation across securities. The positions once taken are monitored regularly and rebalancing exercise is undertaken if the situation or triggers impacting the performance change.

(iii) Investment Horizon: An Ideal Investment Horizon for investments has been given below for the different Products/ Investment Approaches, however, the said time periods are not absolute but based on historical perspectives and experience.

6. (a) Risk Factors (General risks applicable to all Product /Investment Approaches)

- (i) Investments in Securities are subject to market risk and there is no assurance or guarantee that the objectives of the investments will be achieved.
- (ii) The past performance of the Portfolio Manager does not indicate its future performance.

³ Until May 9, 2024, the Investment Approach name was Alchemy Smart Alpha Small Cap

- (iii) Risk arising from the product/investment approach, investment objective, investment strategy and asset allocation, market risk, political and geopolitical risk and risk arising from changing business dynamics may affect Portfolio returns.
- (iv) Risk arising out of concentration - At times, Portfolios of individual Clients may be concentrated in certain companies / industries. The performance of the Portfolios would depend on the performance of such companies / industries / sectors of the economy.
- (v) The Portfolio Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. The Portfolio Manager is neither responsible nor liable for any losses resulting from the operations of the portfolios.
- (vi) The liquidity of the Portfolio investment is inherently restricted by trading volumes in the Securities in which it invests.
- (vii) Investments in general and in the Product/Investment Approaches / Services which the Clients / Investors have opted are subject to wide range of risks which inter alia also include:
 - a) Economic slowdown.
 - b) Volatility and illiquidity of the stocks.
 - c) Poor corporate performance, economic policies, change of Government and its policies.
 - d) Acts of God, acts of war, civil disturbance, sovereign action, epidemics, global pandemic and such other acts.
- (viii) Other risks including cancellation and postponement of settlements, default, legal actions, third party non-performance, misjudgment / incapacitation of the Portfolio Manager.
- (ix) The Portfolio Manager does not guarantee or assure any return on investment, either of principal or appreciation on the Portfolio or preservation of capital.
- (x) The Portfolio Manager may, considering the overall level of risk of the Portfolio, invest in lower rated / unrated securities offering higher yields. This may increase the risk of the Portfolio. Such investments shall be subject to the scope of investments as laid down in the Agreement.
- (xi) The valuation of the Portfolio's investments may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. There will be no prior intimation or prior indication given to the Client when the composition / asset allocation pattern changes.
- (xii) Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Portfolio. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make intended securities purchases due to settlement problems could cause the Portfolio to miss certain investment opportunities. By the same rationale, the inability to sell Securities held in the Portfolio due to the absence of a well developed and liquid secondary market for debt Securities would result, at times, in potential losses to the Portfolio, in case of a subsequent decline in the value of Securities held in the Portfolio.
- (xiii) Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The Portfolio Manager may choose to invest in unlisted Securities that offer attractive yields. This may however increase the risk of the Portfolio. Such investments shall be subject to the scope of investments as laid down in the Agreement.
- (xiv) While Securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Portfolio(s) and may lead to the investment(s) incurring losses till the security is finally sold.

- (xv) The Portfolio Manager may, subject to applicable regulations and authorization by the Client in writing, participate in securities lending. The Portfolio Manager may not be able to sell / lend out Securities, which can lead to temporary illiquidity. There are risks inherent in Securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary as defined under prevalent Securities Lending Scheme to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.
- (xvi) To the extent that the Portfolio will be invested in Securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.
- (xvii) Interest Rate Risk: As with all debt Securities, changes in interest rates may affect valuation of the Portfolios, as the prices of Securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term Securities generally fluctuate more in response to interest rate changes than prices of short-term Securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the valuations of Portfolios.
- (xviii) Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- (xix) Credit Risk: Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.
- (xx) Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the Securities under a particular Portfolio are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- (xxi) Currency Risk: The Portfolio Manager may also invest in overseas Fixed Income or other Securities / instruments as permitted by the concerned regulatory authorities in India. To the extent that the Portfolio of the Product/Investment Approaches / Services will be invested in Securities / instruments denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes / fluctuation in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.
- (xxii) Risks associated with investments in derivatives: The Portfolio Manager may use derivatives instruments like Stock / Index Futures, Stock Options, Interest Rate Swaps, Forward Rate Agreements or other derivative instruments, as permitted under the Regulations and guidelines. As and when the Portfolio Manager trades in the derivatives market, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the Portfolio and the ability to forecast price or interest rate movements correctly. Other risks in using derivatives include the risk of mispricing or improper valuation of

derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Also, the market for derivative instruments is nascent in India.

6 (b) Disclosures on Conflict of Interest: The Portfolio Manager hereby confirm the following:

11. Nature of Expenses

A) The following are indicative types of costs and expenses for Clients availing the Portfolio Management Services:

i) Portfolio Management Fees:

Portfolio Management Fees relates to the fee payable by the Client for the Portfolio Management Services offered to the Clients by the Portfolio Manager. This fee is (as a percentage) related to the Net Realizable Value* or NRV of the Portfolio under investment management and may be fixed, variable or a combination of both, as set out in the Agreement. Brief details of the fees are given below:

a) Fixed management fees:

- The Fixed Fees are charged to the Client at the end of every calendar Quarter at pre-defined fixed rate on daily weighted average NRV. In the event Client makes any partial or complete withdrawal(s), the Client shall be liable to pay the Fixed Fees thereon on pro rata basis calculated up to and until the date of such withdrawal(s).

b) Performance Fee:

- Frequency of charging Performance Fee varies from 1 year to 3 year
- and is generally charged on the Client's anniversary date
- Performance fee is subject to the Portfolio Manager achieving a minimum investment return over and above the hurdle rate (with High water mark principles).
- In the first instance hurdle rate is applicable on starting NRV and thereafter on the High Water Mark.

Performance fee is calculated as below,

➤ Where hurdle is %

Performance Fee = fee % * (Return-Hurdle)

(Where in the first instance:

Return = NRV (as on the date of calculation of fees)-starting NRV ; and thereafter:

Return = NRV (as on the date of calculation of fees)-High water mark).

➤ Where hurdle is benchmark

Performance Fee = fee% * (X - Y),

Where X = Return of the Portfolio, and

Y = Notional Nifty Return

Where in the first instance,

Return of the portfolio = NRV (as on the date of calculation of fees) - Starting NRV and

Thereafter:

Return of the portfolio = NRV (as on the date of calculation of fees)- High Water Mark]

- In the event Client makes any partial or complete withdrawal(s), the Client shall be liable to pay the Performance Fees thereon on pro rata basis calculated up to and until the date of such withdrawal(s) and the Hurdle rate shall be applicable pro rata.
- The hurdle rate shall be applicable pro rata in respect of any further sums placed by the Client from the date of such placement till the date of calculating performance fee .

*"Net Realizable Value" or "NRV" means the net realizable value of the Assets and shall be aggregate of (i) the amount of cash in the Bank Account and (ii) the value of the Client Securities calculated as per the Securities Valuation Policy of the company on the end of any day, net of the receivables/ payables accrued in the Portfolio.

c) Exit fee:

- Applicable on any withdrawal(s) from the Portfolio before the completion of the specified period as per Agreement.
- This fee is charged on partial and full withdrawals
- On partial withdrawal, fee is charged on the day of corpus withdrawal.
- On full withdrawal, fee is charged on the date when account is marked as closed.

ii) **Depository & Custodian charges:**

- These charges relate to opening and maintenance of Depository Accounts (wherever required), dematerialization of scrips and their transfer charges in connection with the operation and management of the Client's Portfolio account.
- These charges are accrued and charged to Clients at actuals on monthly basis.
- The Custodians charge the Portfolio Manager based on rates negotiated with them .
- The indicative rates are given in the table below.

iii) **Brokerage and transaction costs:**

- These costs relate to charges payable to the broker for execution of transactions on the stock exchange or otherwise on purchase and sale of shares, bonds, debentures, units, and other instruments.

With effect from April 1, 2020, dividend income from units of mutual funds and equity shares of domestic companies is subject to deduction of tax at source under Section 194 and 194K of the Income Tax Act. The Company records the tax deducted at source on dividend accruals in client accounts based on the information received from the respective custodians.

Tax deducted at source ('TDS') on interest / TDS on dividend received on equity shares and TDS on capital gain (for Non resident Indian clients) is shown as withdrawal from corpus and in case of reversal of TDS it shall be shown as corpus inflow. For clarification, no TDS is deducted on capital gains for resident clients and is the responsibility of the Client to include such income in their respective Income tax Returns.

13. Accounting policies

Accounting policy followed by the Portfolio Manager while accounting for the Portfolio investments of the Clients.

Basis of Accounting

(a) Books and Records for each Product/Investment Approach is separately maintained in the back office software in the name of the Client to account for the assets and any additions, income,

receipts disbursements and liabilities in connection therewith, as provided by the SEBI (Portfolio Management) Regulations, 2020, amended from time to time.

- (b) Accounting under the respective Portfolios is done in accordance with Generally Accepted Accounting Principles.
- (c) Transactions for purchase and sale of investments are recognized as of the trade date at cost of acquisition/ disposal. In determining the holding cost of investments and the gain or loss on sale of investment, the "first-in-first-out" method ("FIFO") is followed. The same is done at Product/Investment Approach level. The cost of the investments acquired or purchased would include brokerage, stamp charges and any charges customarily included in the broker's contract note or levied by any statute except STT (Securities Transaction Tax). Securities Transaction Tax incurred on buying and selling of securities is treated as expenditure and debited to the profit and loss account.. Investments in equity shares/ units of mutual funds are reported at cost of acquisition as at the reporting date.
- (d) Where eligible Securities have been received from the Client towards initial/additional corpus, the closing market value of the previous day of activation of account / receipt of securities (in case of additional corpus) is considered as capital contribution and deemed to be the cost of investments for the purpose of tracking performance. Closing market value of the investments is based on last quoted closing price on the 'BSE' (in case the Securities are not listed on BSE, the last quoted closing price on the 'NSE' is used).
- (e) Where Securities have been withdrawn by the Client towards Partial/Full redemption, the closing market value of the previous day of such Securities is considered for the purpose of determining the capital withdrawal value. Closing market value of the Securities is based on last quoted closing price on the 'BSE' (in case the securities are not listed on BSE, the last quoted closing price on the 'NSE' is used). Difference in cost and market value of the Securities at the time of partial/ full redemption is recorded as gain/loss of the Portfolio, for accounting purpose.

Income/expenses

- (a) All investment income and expenses are accounted on accrual basis except Custodian & Depository charges which are recorded on payment basis based on the actual bills received.
- (b) Dividend is accrued on the Ex-date of the Securities and the same is reflected in the Clients' books on the ex-date. Dividend income on investments in units of Liquid Exchange Traded Fund (viz. Liquid ETFs) (in the form of daily dividend re-investments) is recognized on receipt basis. During the year, dividend income amount is accounted based on the receipt of information from the custodian. As at the year-end, dividend amount is accrued from the last custody intimation date till the balance sheet date.
- (c) Similarly, Corporate actions such as Bonus / split / rights entitlements are recognized as investments on the ex-bonus / ex- split / ex- rights date respectively.
- (d) In case of fixed income instruments, purchased/sold at Cum-interest rates, the interest component up to the date of purchase /sale is taken to interest receivable/payable account.
