INVESTMENT STYLE

Right Stock + Right Theme + Right Sector + Right Market Cycle = Key to Successful investment Strategy

- Even the most experienced investors are prone to biases which are inherent in the investing process. This results in inconsistent alpha generation.
- Quant model provides the edge by virtue of bringing an unbiased and disciplined approach to investing.
- Portfolio construction with timing, along with risk-reward metrics aims to generate consistent alpha.

Note: The investment objectives and strategy are indicative and there are no assurances that it will be achieved. Investors are advised to take independent tax, legal, risk, financial and other professional advice.

ALCHEMY QUANTITATIVE STRATEGIES WERE NOT BUILT IN A DAY

PRODUCT KEY HIGHLIGHTS*

- Alchemy Alpha Small Cap endeavors to provide a consistent "alpha" investment strategy which build & manage portfolios to deliver consistent outperformance over the long term, using an objective, back tested and data driven approach devoid of any biases.
- Stock allocation, its relative ranking/positioning in the portfolio and timing along with risk controls, play a very important part of the alpha generation process.
- Strong data-based research process, which considers all sources of alpha generation comprehensively, thus helps in creating an unbiased and disciplined investment approach - a key to successful and consistent investment outcomes.

**The investment objectives and strategy are indicative and there are no assurances that it will be achieved. Investors are advised to take independent tax, legal, risk, financial and other professional advice.*

PROPRIETARY MULTI FACTOR MODEL

WHAT	 Growth	 Valuations	 Quality & Risk Management	 Market Cycle
WHY/HOW	• Consistent growth • Focuses on growth factors leading to superior outcomes relative to peers • Growth adjusted for different levels of margins	• Valuations adjusted to market regime • Enterprise Value to EBITDA (Excluding financials) and Price to Earnings • Valuation adjusted to the growth of firm	• Negative marks using forensic accounting ratios • This also helps us filter out companies which are not managed properly OR which eventually turn out to be CAGR killers • Rejection is more important than selection	• Presence/Absence of rewarding market cycle • Capture market regimes using data such as crude oil, inflation, cash reserve ratio • Past behaviour of drawdown and volatility
KEY VARIABLES	✓ Sales ✓ Profit after tax and free cash flows ✓ Margins (Net & EBITDA)	✓ Price to book ✓ Enterprise value to EBITDA ✓ Price to earnings ✓ Price to cash flow	✓ Price to book ✓ Enterprise value to EBITDA ✓ Price to earnings ✓ Price to cash flow	✓ Risk adjusted historical alpha ✓ Relative draw-downs ✓ Delivery volume

Note: The proprietary multi-factor model given here is based on internal research and assumptions and should not be construed as investment advice or a guarantee of returns. This is for illustration purposes, and it may change at the discretion of the Portfolio Manager.

INVESTMENT PROCESS & PORTFOLIO CREATION

1

Investible Universe

- Constituents of Nifty Smallcap 250 index.
- Investible stocks must pass a stringent system of eliminating value destroying factors & are sometimes vetoed based on risk and fundamental forensic analysis.

Alchemy Alpha Small Cap Algorithm

- Evaluate stocks using a combination of factors, including growth, balance sheet strength, price action, sector strength and market cycle.
- A combination of these factors is used to arrive at a score for a company. There are no hard cuts off for inclusion of a particular parameter. The performances of the companies are ranked relative; both to the benchmark and the sector in which the company operates.

2

3

Portfolio Creation

- Stock selection is based on the ranks attained by the stock, there are no sectorial weights w.r.t to the benchmark which the strategy is restricted to.
- Setting allocation % is basis the algorithm rules.
- High conviction ideas get higher weightage into the portfolio. The weights of the stocks range up to 8% at cost.

Portfolio Monitoring

- On an ongoing basis each company is evaluated with respect to its peers and benchmark.
- Robust risk management frameworks are inbuilt in the strategy. If a company's rank deteriorates then the stock would be trimmed or exited from the strategy. A stock providing a better risk reward opportunity takes its position.
- Objective is to have the highest ranked stocks in the portfolio.

STANDING TALL
ALCHEMY CAPITAL MANAGEMENT

ALCHEMY CAPITAL MANAGEMENT

One of the pioneers of bespoke Portfolio Management Services in India.

Manages/Advises AUM of over USD 1.3 billion (as of August 31, 2026).

Legacy of over 2 decades, built on trust, integrity, and expertise.

Team of stable and experienced investment professionals with deep industry knowledge and the ability to navigate market cycles.

Serving HNIs, UHNIs, Family Offices, Fund of Funds, Institutions and Corporate.

Disciplined investment approach with an emphasis on research, insights and long-term investments for sustainable returns.

ALCHEMY'S INVESTMENT PHILOSOPHY

We believe that consistent and superior long term absolute returns can be made across market cycles by investing in growth companies with good management teams.

Robust Financial Metrics

We like businesses which address large and growing external opportunities, have a competitive advantage in effectively exploiting those opportunities and have a scalable business model with higher-than-average Return on Capital Employed (ROCE) over the investment horizon.

Strong Growth Fundamentals

While growth companies form the core of our portfolio, we also tactically invest in deep value opportunities and special situations that may appear due to and during market cycles.

Exceptional Management Teams

We believe that management teams are key to business success. We look for managements which have aggression, are aligned to business outcomes while simultaneously having respect for governance and capital allocation.
