ALCHEMY SMART ALPHA 250 FUND

Strategy Endeavouring to Deliver Consistent Alpha

ALCHEMY CAPITAL MANAGEMENT

July 2026

Alchemy Smart Alpha 250 Fund is one of the schemes of Alchemy Alternative Investment Trust, registered with Securities and Exchange Board of India (SEBI) as a Category III – Alternative Investment Fund, vide registration number IN/AIF3/17-18/0381. Alchemy Capital Management is registered with the Securities and Exchange Board of India (SEBI) as a Portfolio Manager and appointed as the Investment Manager of the Trust and the Fund.

Investment Objective & Strategy^:

The investment objective of Alchemy Smart Alpha 250 Fund is to carry on the activities of a Category III AIF as permissible under the Regulations and generate long term capital appreciation by investing in opportunities such as (i) investing a minimum of 65% of the NAV of the Fund in listed equity instruments of large & mid cap Portfolio Companies in India (ii) a maximum of 10% of the NAV in IPO opportunities or any other instruments permitted under Applicable Laws. Provided that the above limits shall not be applicable during the initial period of portfolio construction which shall not exceed a period of six months.

The investment strategy for the Fund aims to generate long term capital appreciation by investing in opportunities that include (i) investing in listed equity instruments of Portfolio Companies in India, (ii) IPO opportunities or any other instruments allowed under Applicable Laws. The investment strategy for the Fund will be focused on large and mid-caps. The Fund has been set up for the purpose of investing primarily in equity instruments listed on Indian stock exchanges of Portfolio Companies in India.

Investment Framework^:

The Investment Manager follows its proprietary framework in order to identify various investment opportunities. The proprietary framework is eQGP Framework: (e; Environment: Q; Quality: G; Growth :P; Price).

The eQGP Framework assesses the strength of both the market and the company and then creates a portfolio relevant to that level of strength in the market. The Investment Manager assesses the strength of the company from three different angles – the strength of its quality, the strength of its earnings growth and the strength of its price performance. The key differentiating factor of the strategy is considering weighted average score of each company based on e score.

Why Invest in Large and Midcaps?

- Largecaps help reduce the impact on the portfolio during volatility, while Midcaps offer superior growth potential.
- Largecap and Midcap universe accounts for 79%** of the total market capitalisation of all listed companies on NSE & BSE.

Largecaps
- Blue chip companies
- Market leaders
- Established track record

Large & Midcaps
An optimal mix of Largecaps and Midcaps which can deliver high alpha with lower volatility.

Midcaps
- Emerging businesses
- Above average growth profile
- Improved management and capital allocation

Portfolio Construction Process

Our universe generally consists of top 250 stocks by market cap → For each company, we have scores for Q, G, P → The weights for Q, G, P are based on e-score → We consider the weighted average score for each company → Top 25 companies with highest score make their way to the portfolio → Rebalancing is an on-going process

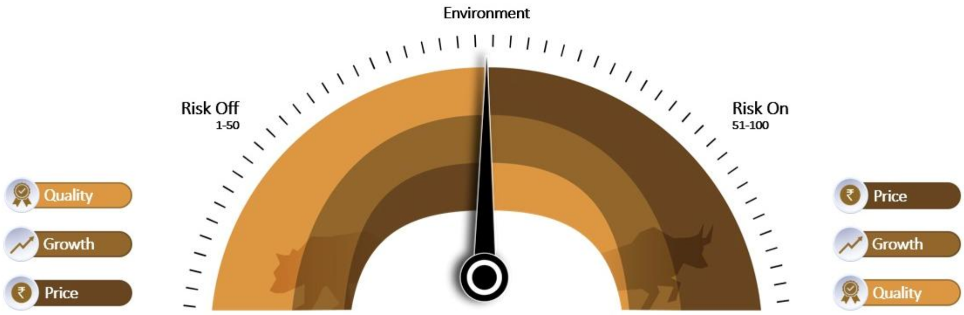
^These are not the complete terms of the Fund. Please refer the Private Placement Memorandum and its Addendum for complete details. | The investment objectives and strategy are indicative and there are no assurances that it will be achieved. Investors are advised to take independent tax, legal, risk, financial and other professional advice.

eQGP – Our Unique Framework

Environment Meter



QGP

The philosophy of the product is to get aggressive in a risk-on environment and defensive in a risk-off environment. Our rating band on the environment is based of multiple factors. Few of them are:
- Liquidity conditions in the market
- Interest rate conditions in the market
- Improving or deteriorating macro growth
- Improving or deteriorating macro balance sheet
- Price action parameters in multiple sections of the market
- Trends in corporate profits
- Currency situation
- Policy level support

eQGP - Quality

The quality of a business comes from multiple attributes. The higher the number of these attributes in favour, the higher the quality. Our quality rating band is based of multiple factors. Few of them are :
- Capital efficiency - absolute & relative
- Leverage ratios - absolute & relative
- EVA generation track record
- OCF generation track record
- Consistency in profit generation
- FCF track record
- Credit rating
- Management quality

eQGP - Growth

All good things in the company need to culminate into business growth. Our growth rating band is based of multiple factors. Few of them are:
- Profit growth - absolute and relative
- Operating efficiency - absolute and relative
- Business growth
- Market share gains
- Consistency of growth

eQGP - Price Action

Returns come from price action and movement. Our price action rating band is based of multiple factors. Few of them are:
- Tailwinds in the price behaviour - absolute and relative
- Ownership trends
- Consistency of outperformance
- Liquidity
- Risk reward potential
